

HUSSIEN HAMZA GHADDAR

Lebanon, Ghazieh | +961 81 249957 | hsenghaddar76@gmail.com | [LinkedIn](#) | [GitHub](#)

Education

Rafik Hariri University (RHU)

BS in Computer Science

Mechref, Damour

2024 – 2027

- **GPA:** 91
- **Relevant Coursework:** Advanced Programming and Data Structures, Database Management Systems, Web Programming, Design and Analysis of Algorithms

Experience

Techryt

Frontend Developer Intern

Remote - United States

Aug. 2025 – Oct. 2025

- Built interactive React components, including mini-games and reusable UI elements, that improved engagement across the site.
- Delivered responsive layouts with Tailwind CSS, reducing layout bugs across screen sizes.
- Integrated frontend features with backend APIs and handled request/response edge cases during development.
- Used Git and GitHub daily for branching, reviews, and clean commits in fast-paced development cycles.

XpertBot

Backend Developer Intern

Remote - Beirut, Lebanon

Oct. 2025 – Nov. 2025

- Built Laravel backend features, API endpoints, and data-processing logic integrated into production workflows.
- Refactored routes, controllers, and Eloquent relationships to reduce query overhead and improve reliability.
- Designed validation and structured API responses to accelerate frontend integration and reduce rework.
- Worked with Git branching, pull requests, and code reviews to maintain an organized team workflow.

Techtalks

Backend Developer Intern

Remote - Beirut, Lebanon

Nov. 2025 – Jan. 2026

- Collaborated on a 21-endpoint Laravel API supporting authentication, materials, forums, and tutoring sessions.
- Worked across 18 database migrations and 9 Eloquent models with validated, standardized JSON responses.
- Contributed to Sanctum authentication, role-based access, filtering, pagination, replies, and attendance.
- Coordinated development through Jira-managed Scrum tasks, feature branches, pull requests, and code reviews.

Leadership & Activities

ACM Student Chapter, Rafik Hariri University | Webmaster

Jul. 2026 – Present

- Manage the chapter's web presence, publish event announcements, and collaborate with chapter officers to organize workshops and student outreach activities.

Youbee.ai | Student Ambassador

Jul. 2025 – Present

- Represent Youbee.ai on campus through student outreach and event coordination; organize and host technical activities, including a hands-on Web App Security workshop at RHU with the IEEE Student Branch.

Skills

Frontend Development: HTML, CSS, JavaScript, Angular, React.js, Tailwind CSS, Laravel Blade, Responsive Design

Backend & Database: Laravel, MySQL, PHP, phpMyAdmin, RESTful API Development, CRUD, .NET Framework

Programming Languages: C#, C++, TypeScript, JavaScript, PHP, Python

Tools & Frameworks: Vite, Docker, Git, GitHub, CI/CD Basics, Visual Studio, WinForms

Libraries: Pusher, Livewire, Laravel Echo, Bootstrap, Sanctum, Composer, npm, Breeze

Languages: English, Arabic

Projects

Course Compass – Constraint-Based Course Scheduling Platform | *React, TypeScript, Laravel, MySQL, Python, FastAPI*

- Collaborated on a React, Laravel, and Python platform generating the five highest-ranked conflict-free schedules.
- Contributed scheduling constraints for courses, credits, availability, instructors, gaps, and linked lecture/labs.
- Worked on authentication, saved and future schedules, partner matching, admin tools, and CSV offering imports.
- Helped validate the platform with 90 tests: 43 frontend, 34 backend, and 13 scheduling-engine tests.
- [GitHub Repository](#)

Electricity Subscription Management System – Freelance Client Project | *Electron, TypeScript, Node.js, SQLite, HTML, CSS*

- Engineered a production desktop application for an electricity subscription business managing approximately 1,000 subscribers and 700+ meters.
- Implemented metered and fixed-amperage billing, accounts, payments, balances, expenses, and financial summaries.
- Built search, legacy migration, A4 invoices, meter reports, PDF export, batch printing, and multi-currency billing.
- Optimized database queries, caching, and application state for reliable performance on low-specification hardware.
- Implemented automated backups, data restoration, persistent workspaces, and installer-based deployment.

Padel Court Management System | *.NET, C#, MySQL, WinForms*

- Built a desktop application for court bookings, tournaments, matches, and user management.
- Implemented role-based login, real-time availability, loyalty pricing, and pop-up validation.
- Used MySQL for reliable persistent data storage.
- [GitHub Repository](#)

Social Media Web App | *Laravel, MySQL, Blade, Livewire, Pusher, Laravel Echo*

- Built a real-time social platform with authentication, user profiles, and privacy controls.
- Implemented a Livewire friend system, comments, likes, and instant updates using Pusher and Laravel Echo.
- Optimized Eloquent relationships and backend logic for faster and more scalable data flow.
- [GitHub Repository](#)

Customer & Invoice Management REST API | *Laravel, Sanctum, MySQL, PHP, JSON API Standards*

- Developed a versioned REST API with role-based authentication and standardized JSON responses.
- Added bulk insertion, advanced filtering, PATCH/PUT support, and API resources and collections.
- Designed consistent JSON responses using Laravel API resources and resource collections.
- Implemented secure access control and performance-oriented query handling.
- [GitHub Repository](#)

DailyBites – Smart Meal Planner | *React, JavaScript, Vite, HTML, CSS*

- Built a meal-planning application with recipe browsing, filtering, favorites, and weekly plan generation.
- Refactored a vanilla JavaScript codebase into React with Vite and a reusable component-based structure.
- Implemented state-driven rendering, browser-storage persistence, validation, and dynamic grocery-list generation.
- [GitHub Repository](#)

Certifications & Awards

2024 Full Stack Web Development Certification

Hands-on with HTML, CSS, JavaScript, Angular, PHP, and Laravel; applied MVC, REST APIs, and database integration.

Youbee.ai

2024 Responsive Web Design Certificate

HTML/CSS with responsive layouts using Flexbox, Grid, and mobile-first design; built adaptable UI components.

freeCodeCamp

2024 University President's Honor List

Recognized for outstanding academic performance during Fall 2024 and Spring 2025.

*Rafik Hariri
University*

2025 Advanced Web Development Certificate

Training in Eloquent, APIs, authentication, full-stack Livewire integration, real-time features with Pusher/Echo, and Sanctum access control.
